

GLYCOSYLATED STEROID DERIVATIVES WITH ANTI-MIGRATORY ACTIVITY

Abstract of the Disclosure

Glycosylated steroid compounds having anti-migratory activity and methods for their preparation are disclosed. Pharmaceutical compositions having an effective amount of the glycosylated steroid compounds are also disclosed. The glycosylated steroid compounds may be used as a medicament. Preparation of medicaments containing the glycosylated steroid compounds for treatment of diseases associated with cell migration, in particular, cancer, are disclosed. The glycosylated steroid compounds or pharmaceutical compositions containing the glycosylated steroid compounds may be used in the treatment of diseases associated with cell migration, in particular for the treatment of cancer.
